# NTT Group at Glance (2)

#### Risk in Thailand

Army coupd'etat

Red-shirts riot

Bangkok shutdown

2006 2008 2010 2012 2014 2007 2009 2011 2013 2015

Airport occupation

Flood in Thailand

Bomb explosion

## **Thai Concerning Point**

#### Risks of demonstration and flood

- Difficulty in choosing the suitable locations
- Security management for colocation space

## Power and cooling not running 24\*7

- Cost of generator and battery is very high
- Office cooling system cannot cover 24\*7

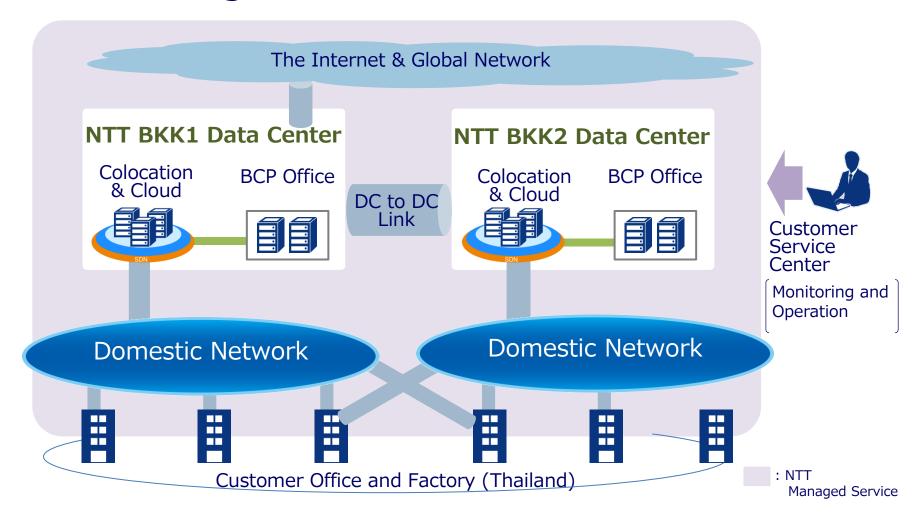

### How to keep Network reliability

- Backup network availability
- On premise server can be a bottle neck

#### NTT's Solution

# Realizing Cost Down and Business Continuity using Data Center as ICT Infrastructure Hub

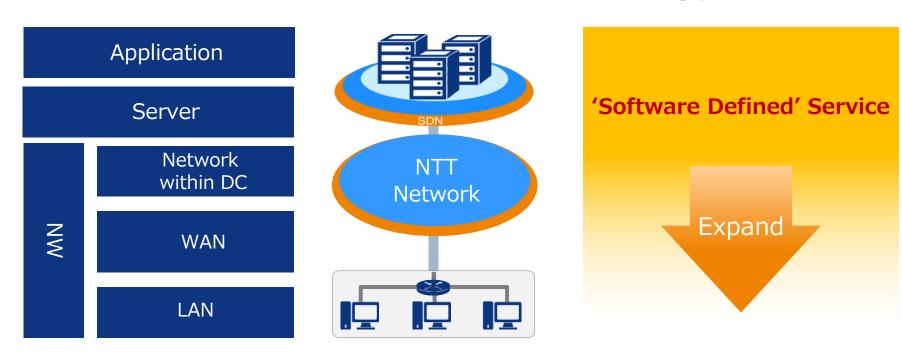

#### What SDx Can Realize

#### **Software Defined Technology**

# Control function of hardware (server and network) by software

## Intelligent driving support system

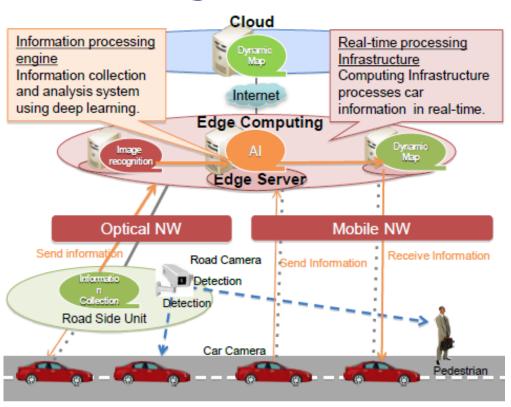

10

# IoT

#### **Internet of Things**

Clash avoidance demonstration by NTT Lab's with AI and edge computing technology.

This was demonstrated at CES2016 with TOYOTA and Preferred Networks.

# Bangkok 2 Datacenter (1)
