How to develop advanced international **IT human resources.**

About the current situation of IT human resource shortage in Japan
and the situation of IT human resource development in Myanmar

Today's Message

Today's Agenda

- Why do Japanese people bother to raise IT engineers in Myanmar?
- How do we bring them up to IT engineers?
- A gift for everyone here.

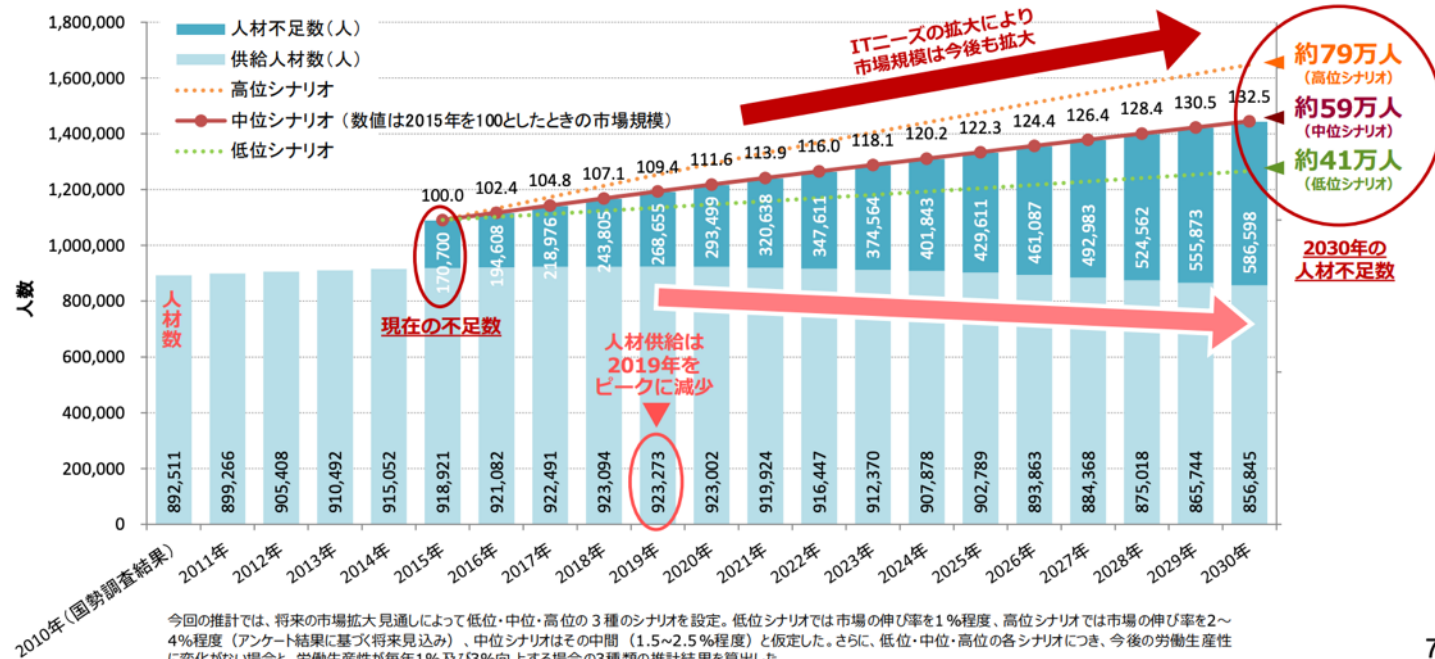

Why do Japanese people bother to raise IT engineers in Myanmar?

2

今後のIT人材
の不足規模

IT人材の不足規模に関する予測

- 2015年の人材不足規模：約17万人
- 2030年の人材不足規模：約59万人（中位シナリオ）
- ⇒ IT人材不足は、今後ますます深刻化

The Japanese government has estimated that by 2020, **300,000** IT engineers will be insufficient.

It's a big opportunity!

But...

- There is a big problem.
- IT knowledge
- Japanese
- Japan working visa

So we
decided to
create an
educational
institution
in Myanmar.

That is ...

Education Centre

At Myanmar,
They takes to
study three
things.

Program knowledge

Japanese Language

Knowledge to take a Japan
working visa as an IT engineer

- They can grow only by challenging.
- As a result, they can work in Japan faster than anyone else.

- In Japan, it is still not enough IT personnel to train Myanmar people.

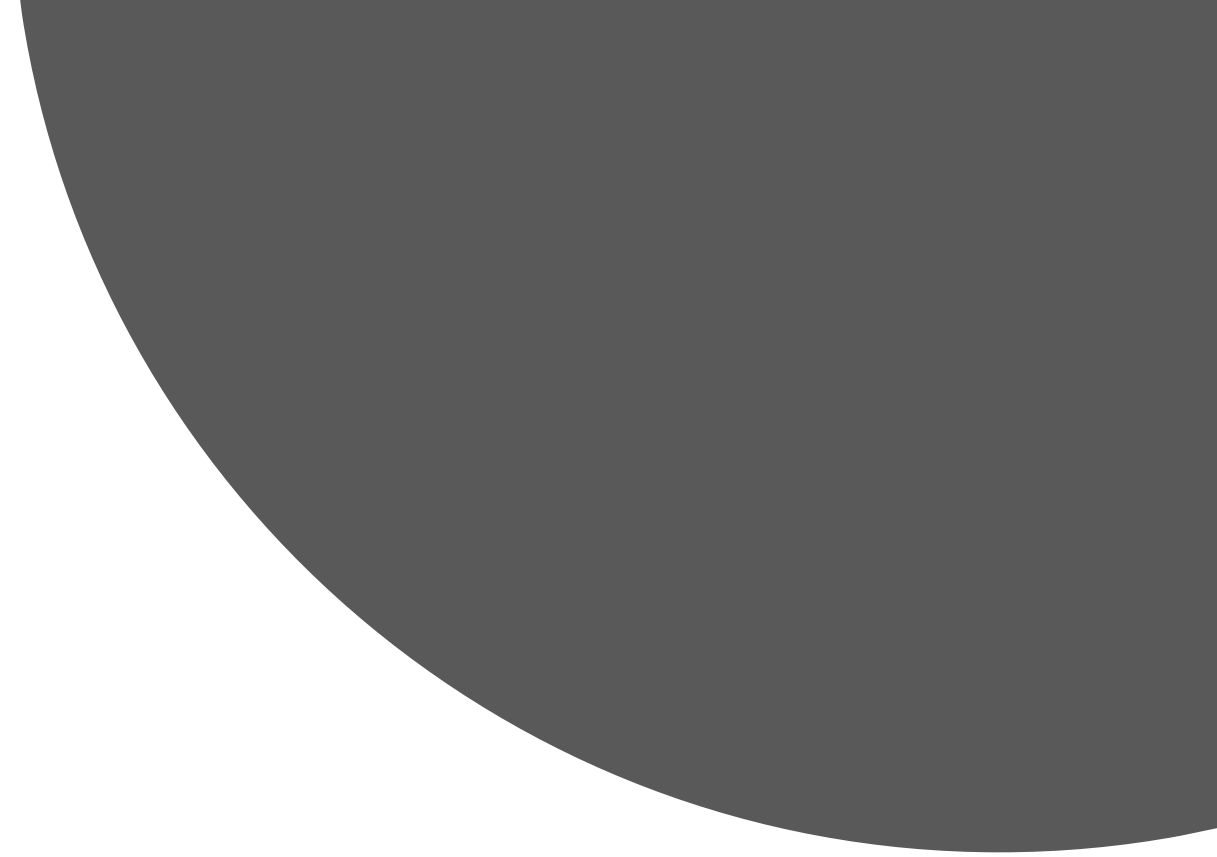

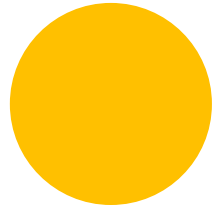

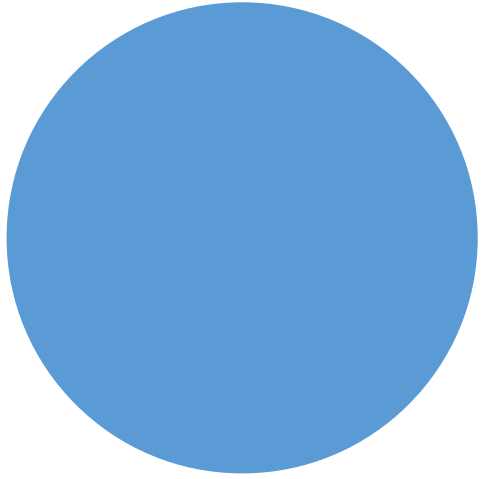

We have the know-how to get IT education, Japanese language education and working visa in developing countries.

We'll wait for your challenge!

- Would you like to train together IT engineers who can earn a foreign currency for the economic development of your country?

Thank you!
