| Name | Ms. Renata Figueiredo Santoyo |  |
| Country | Brazil | |
| Organization | National Agency of Telecommunication | |
| Title | Manager Advisor | |

What did you learn in this training course?

This training course was important to realize the importance in standardization around the countries and the role of information in this process, to result in good choices that will make life more efficient. Standards can contribute for the economy, technological diffusion and a good work in this field can have positive impacts is strategic for a higher-value added in manufactures, services, environment and politic.

What is the good point(s) of this training course?

Information is a very important issue in every decision, and this course was a unique opportunity to know how the technology is being developed, what are the expectations about standards in the future. This real notion about how the public and a private sector work here were really rich experience.

What is your impression to ITU-AJ?

My feeling about the ITU-AJ is that it realize a very serious work in promote the national standards and let the world know in a good way the effort that is being done in this field in Japan.

What is the field(s) in which you are interested?

I'm interested in the ICT standards, convergences technologies and ICT focused in environment and climate change.

Are there any Japanese organizations you would like to contact?

As my professional activity is being focused on new technologies that overcome and the tests which are necessary to their commercialization I would like to be contacted to the certifications organizations and the ITU-AJ to exchange ideas about this process.

May ITU-AJ transfer the e-mail from the organization which has interested in you or your organization to you?

Yes
