

Interview Sheet

Name	Elmer Guido Alejandro Rojas	
Country	PERÚ	
Organization	National Institute for Training and Research on Telecommunications –INICTEL-UNI	
Title	Professional in Research	

What did you learn in this training course?

How to make design telecommunication projects using PCM, how to apply currents telecommunications status and market trends to be considered in our future projects as a success model of efficiency network.

What is the good point(s) of this training course?

Training with different colleagues from other countries collaborating and work together to get the suitable solution for each other.

Convenient baselines lectures and hands on practice drills for design our own network solutions.

What is your impression to ITU-AJ?

Very important collaborator to bring this course to help developing countries engineers how to reduce digital divide through designing telecommunications facilities in rural areas using suitable and environmental safety technologies.

What is the field(s) in which you are interested?

Rural telecommunications technologies.
New Technologies in eco power solutions

Are there any Japanese organizations you would like to contact?

NTT – Rural Networking division
Panasonic – Eco Solutions

May ITU-AJ transfer the e-mail from the organization which has interested in you or your organization to you?

Yes
