

Name	Georgina Chingonzo
Country	Zimbabwe
Organization	Ministry of Information Communication Technology, Postal and Courier Services
Title	Director
What did you learn in this training course?	
A lot on standardization, what standardization is, the need for standardization, the process and where Japan is in terms of standardization. The standardization activities in Japan and relations with regional and international standardization bodies.	
What is the good point(s) of this training course?	
The training course is very informative. Learning is both from theory and what is currently prevailing i.e what is actually happening.	
What is your impression to ITU-AJ?	
I am impressed. The regional ITU area office for Southern African Development Community (SADC) is based in my country and I have plans to engage them so that we collaborate more. Even if my country is currently not manufacturing ICT gadgets but we need to be guided by standards in our imports. I am not sure if it is possible to have something like ITU-AJ in our country.	
What is the field(s) in which you are interested?	
ICT Policy planning and since 2014 I am also now working with the organisations that are tasked with standardization especially the Regulator and the Standards Association of Zimbabwe.	
Are there any Japanese organizations you would like to contact?	
Yes. First the Ministry of Internal Affairs and Communication especially the Department that deals with ICT policies. ITU-AJ, TELEC and the mobile operators NTT DOCOMO and KDDI (for mobile operators my interest is following up on future technologies).	
May ITU-AJ transfer the e-mail from the organization which has interested in you or your organization to you?	
Yes.
