

Name	RAMESHWAR DHARIWAL	
Country	INDIA	
Organization	DEPARTMENT OF TELECOMMUNICATIONS	
Title	DIRECTOR	

**What did you learn in this training course?**

1. Gained the knowledge regarding importance of various standardization activities in ICT policy planning, standardization bodies at regional and international level and their contribution thereof for overall development of societies.
2. It proved to be an optimum platform for the participants to keep ourselves abreast with the latest development taking place in ICT sector.
3. Learned about Deployment of better ICT infrastructures to overcome challenges using standard procedures and activities.
4. Had brainstorming sessions and a rare opportunity of face to face discussions with experts from Japan on current challenges in ICT networks and learning from the experience of Japan.
5. Learned about improving the standard of living of the communities using better ICT infrastructures and harnessing the full potential of technological advancement.
6. Realized the better utilization of ICT infrastructure to mitigate the damaging and devastating after-effects of natural calamities in the overall interest of humanity.
7. Came to know about the magnificent contribution played by ITU-AJ in fostering the innovation and development activities at various world forums in the past and continuing the same currently at stunning pace.
8. Learned about the commendable role played by JICA in providing overseas cooperation for uplifting the status of living in societies of developing and underdeveloped countries throughout the globe purely on humanitarian ground

**What is the good point(s) of this training course?**

1. ITU-AJ & JICA have provided a very rare platform for the participants to have an opportunity to interact face to face with experts from Japan.
2. The information and facilities were shared by the Japan experts and agencies freely and fairly purely in the interest of participating members.
3. The participants could update themselves and came to know about the latest developments happening in the ICT arena at international level.
4. The participating members could realize the need of standards and their contribution thereof for the overall development of societies.
5. The delegates had brainstorming sessions with experts from Japan on current challenges in ICT networks and learning from the experience of Japan to resolve their local issues.

**What is your impression to ITU-AJ?**

The magnificent contribution of ITU-AJ in the past, in the field of making standards through various world forums, bringing innovations and taking societies to further new heights is just amazing and deserves a great applause. Its ongoing activities in the area of development of standards is really marvelous despite the various constraints faced at various platforms due to diversity of cultures, languages and regional issues at world level. Taking all the societies, cultures, regions and countries together and making fantastic progress in the field of standardization and its implementation is really a herculean task and ITU-AJ deserves a great appreciation for progressing by leaps and bounds. I wish a great success to this fantastic organization which is full of talent and has the potential to turn the world around.

**What is the field(s) in which you are interested?**

The development and implementation of new standards and removal of difficulties in current ICT networks in the present scenario in my country. Particularly I am interested in evolution of 5G network, new innovations and implementation for smart cities..

**Are there any Japanese organizations you would like to contact?**

MIC, NICT, TELEC and various private Telecom Service Providers and their R&D institutes.

**May ITU-AJ transfer the e-mail from the organization which has interested in you or your organization to you?**

Yes, It will be my pleasure and will be obliged if contacted by these organisations.
