What is the good point(s) of this training course?

I have been quite fascinated particularly with the lectures and field trips to various institutions around Tokyo and have realized the technological innovations that Japan is leading in and how far our developing country has yet to catchup on. I am very impressed at how this program has been structured and tailored to the meet the course objectives and expected outputs to enhance participant learning.

What is your impression to ITU-AJ?

I think ITU-AJ is doing an exceptional job of supporting such initiatives like this. Its cooperation activities towards assisting developing countries like ours have broadened our mindsets, realization and knowledge on the importance of latest technology trend and international standards relating to standardization and ICT.

I am privileged and thankful for such an opportunity from ITU-AJ's cooperation with JICA and would hope to attend more trainings like this in the near future.
